
Coronavirus: The Real Story – Continued by M.T. Keshe

2020 01 31 PM Public Teaching in Portuguese

This is a summary of the talk about the Coronavirus given to the Brazilian Knowledge Seekers and is a continuation of the talk given in the 102 One Nation, One Planet, One Race (see also 311 through 313 KS Workshop.)

Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (Summary by KF Brazil)

Summary:

The One Cup, One Life has been setup primarily for the Coronavirus, which is what you call a weak virus, that weakness is what creates the problem, but it connects to the single-stranded RNA. The prime objective of the One Cup reactor system is to create a composite single-stranded Gans to deplete the energy of the single-stranded virus, and it is extremely effective. This Gans is good for other viruses as well, but you have to use it correctly. When you make the Gans, Amino Acids (AA) form a fatty layer on the top of the water in the reactor. "You need the AA's with the mixture for the drinking" (of the Gans water).

A question was asked, if each one of us in Brazil and around the world are making the One Cup, can it create this same field around the planet too? K- Yes, you can link up without a

doubt. But the process now is, how fast and to get as many people as possible to make these reactors to save themselves and humanity.
How we can make man ready for this change.

The Planned Chaos in World:
The plan is to create total chaos and to take total control of the planet. We will respond very rapidly in a different way. If the situation continues to go this way, in the next few weeks there will be no transportation across any nation. There will be no ships going anywhere. If we see the spread of this disease in another 20 to 30 countries in the next 2 to 4 weeks, we'll have a total lock down by all the nations. We'll see food and medicine shortages and nations, literally tearing themselves apart.

How it could play out:
The problem is much bigger then people understand and much worse then what we have been told. We'll have millions of people stranded in foreign countries not being able to return home. We might start to see this next week. The food and financial backing will run out. People don't understand what is on the horizon with this release. If it gets hold and increases any further, there will be no transportation across this planet. There will be no ships to carry the food, because shipping is a very interactive business and people won't want to risk contamination in the Chinese ports. Planes will stop flying to Chinaand of the ones that did, if they were contaminated, now they are being used internally in Europe. So you can see how fast this is going to spread. The chaos will build up very quickly. If we do not see contamination in a number of countries, and we know which countries they are, then you'll understand how the whole nation has been taken to ransom and thus humanity.
In the next 14 days we are waiting to see the start of food anarchy, which means people will fight for food in many countries. We see food, fuel, and medicine shortages coming soon. We are already aware that national governments have been and are moving into secure food depots, what you call food backup. Give it 4 weeks, if it goes this way people will eat animals on the street. If we find a solution for it we are saved, but if no solution is found in the next 4 weeks we'll see big problems right across the planet. Farmers in Americawho have food but will not be able to ship it, and people in China who have no food, will not be able to receive it. The virus will be the last worry for many, and for many, to catch the virus will be the only solution. The KF will respond accordingly.

Using Viruses as Acts of Terrorism:
These viruses are promoted and released deliberately by criminal organizations and it's a new way of hijacking and extortion. You have to understand why China was targeted with this virus, with 1.4 billion doses of vaccine, it's cash in the bank. American companies are going bankrupt, so multinationals are developing and inciting these kinds of viruses to extract money. It's a kind of terrorism and especially with this virus, it can be considered a terrorist activity. Viruses like the African Pig Flu was deliberately introduced by the Americans into the Chinese territory to kill as many pigs as possible, that it would force the Chinese to buy pigs from American farmers. We are going to see more of these attacks as the peace process gets going. With the release of KF One Cup, One Life, and what we are going to release in the coming time, these kind of virus attacks will no longer be effective, they will need to come up with something new.

Development of Muscle Tissue Viruses:
The Pharmaceuticals have been using airborne viruses, but now that KF has found a solution for them, we'll see them turn towards cell and muscle tissue viruses. If they go this way, we'll see them come out in the next few years. Muscle tissue viruses work very rapid and are horrendous, absolutely horrendous. At this moment in time, there is no cure anywhere in the world regarding muscle tissue viruses. Through our securities we are

observing that Pharmaceuticals are involved with these kinds of criminal activities and have turned their view on muscle tissue viruses. If we see muscle tissue viruses being released in the next 2 weeks, then we will release a new technology to overcome it, which requires a totally different structure. In man's cycle we have seen very few, only a handful of tissue viruses. The main part of the viruses in space are tissue and not airborne viruses.

Quantum Spray copy of the Gans:
Some Chinese companies in the past 24 to 48 hours have brought into the market what they call, "Quantum Spray", it's actually the Gans and they have cheated the Chinese government with it. The people involved are Knowledge Seekers and they don't want to connect their product to the KF, so they changed the name from Gans to "Quantum." We have seen this trend where a lot of KS change the name of their product so that it doesn't connect to the KF. They claim is as theirs. It's an absolute shame to steal a gift. But that's okay, we gave it free and what matters is that they are saving lives. We see this kind of cheating everywhere, it's part of the structure of the human being.
A KS said, I am sad that people are trying to sabotage the technology by doing this. K- No, no, let me explain, nobody can sabotage the technology.
A KS who said, I made a Pain Pen that is similar to Gans, and I put the name Quantum on this Pen, Then he explained his reasons.
K- .. The reality is, it doesn't matter what name we give it, if it saves a life, or brings happiness to a father or a child, that is all that matters.
Let me tell you. I received something very shameful from one of the Brazilians and I'll read it to you. I advised them to leave the KF, at least don't work around the KF. It says that, "I should reflect if I really want to help humanity, as the man he is in touch with does." It's shameful for this guy to even be around the KF. Absolutely shameful. I have given one of the most powerful technologies freely to man, and this idiot tells me, if I really want to help humanity. I advise you to just leave the KF because it means you never understood. We put our lives and our technology freely in the hands of the man and just because this guy wants to make some money. I advise you to leave the KF. I prefer not to have you around or anything to do with this gentleman around the KF. This is how humans are.
We have no problem with people using the technology it doesn’t matter under what name, as long as it helps the others. We see many people especially in Brazil, who are around the KF to try to put profits in their own pockets. They don't carry any ethos. This is the problem with human beings they come to the KF with no knowledge, then they learn, and then they think they have become gods to themselves, because no one every paid attention to them before and now that there are getting attention and they forget their place. Whether it is stealing names, or transferring knowledge as if it is theirs, and being what I call, animals, it is the animal behavior.

Food Gans:
The biggest problem for China now that they are getting a lock down is to feed their nationals The process for making food Gans will be released sometime in the very near future if the solution for this problem doesn’t come. We have offered it to the Chinese government in the past 32 hours. We said to them that those who stole the technology for the virus, let them come up with the solution for the food crisis. It is a shame that the Chinese have become such thieves by helping themselves to the technology. But the food Gans is a very special process known by the KF.
What we see can be so extreme that it will change the course of humanity if this virus is not tackled very quickly by the world leaders. We will see industrial nations coming to a halt, then what we call the food Gans will only be a small part of the bigger problem. We could see that all the electronics will be stopped, there will be no train and the shipment of goods will be stopped. We saw in the past 48 hours that a new dimension to this virus is emerging internationally. We have about a maximum 4 to 6 weeks for the governments to bring this

under control. We are seeing it as it is coming up and maybe some of you will understand when we said, One Nation, One Government. It will lead some nations to do that job.
I am sure that the military forces will have no say. We have seen bravery in the past from soldiers and governmental officers when it came to Chernobyl and taking planes and dumping themselves with the concrete and getting radiated and died. But we don't see that many soldiers, who will march in when they no there is no solution.
If I release the pictures and videos we are receiving confidentially around the world, you'll understand where my concern comes from. At this moment we know people who traveled to China during the holidays and stayed in the hotels. When they got a fever, they went to the hospital, but there was no room available and the hospitals wouldn't allow them in. When they went back to their hotels, the hotels wouldn't allow them back in either. Now there are hundreds of thousands people who are sleeping on the street, because their families don't want them. Fathers don't let their children into the house because they have a fever. I can show you videos, then you'll understand my concern. I can show you a picture of a father chasing his son with a dog not to come into the house, because he came with a fever from the hospital. We are very concerned but the picture doesn't look good if it goes out of control. The KF KS should get ready for it.
One of the first things we'll see is that a lot of international meetings with world leaders will be cancelled in the next 4 weeks. We'll see massive reduction in world banking, bank failures and credits not being payable because there is no trade. If this extends into April and May, the world banking system will collapse.
The people who organized this could not even imagine that things could get this bad. It is for KS to understand that if no step is taken to stop this, this is the sequence of events we expect in the next 3 months. If the virus takes hold and even if it kills 10% of its victims, it will be a disaster for many countries. The anarchy outfits will create more problems than the actual problem itself. It will come down to who has the knowledge and can safe guard their nationals. As KS you have to be ready, you have everything to protect yourselves, families, friends, cities. When countries lock themselves in to protect their citizens along with it they'll bring the problems in.
Nothing might happen but as KS you have to ready, make everything ready. If we see that the critical position in regards to food comes in the next few days, then we'll release another video on, what we call, the creation of domes. You can create isolated domes for protection, for water that is not contaminated, or when you need clothing that is not contaminated. If this process goes out of control, then as we see it, you as KS will have a better chance, or at least you will have the choice to decide what you want to do with your life. As a nuclear physicist and an advisor to some organizations in the past, I always advised the military, that if you see the dome, the light of nuclear attack, walk into it, don't walk away from it. Because the suffering after contamination is thousand times worse than dying in one go.
A KS asks, you said that this virus is the second stage and that you saw that people who were killed by this virus had already been exposed to the first stage, which was the African Swine Flu. So in this situation where the virus is spread all over the world, does it have less effect on the people who were not contaminated with the first virus? Or is it as you explained, the weakness in the emotion side of the human?
The reality is that nobody knows, the Chinese say that very few people have recovered from the disease. The problem is would they give the disease to the next person?
We do not yet know if even the ones which we have supported with the KF technology have been able to create immunity to the virus itself. We have to wait and see. But the beauty or one of the advantages with this technology is that if we put one Cup next to the other Cup it will drain it, or take energy from it. The people who come out of this virus will do the same to the others who have the virus, drain it. Remember, we have found a solution for the Pig Flu, but there is no facility, except the KF resources to produce the materials needed so that it can benefit all the pig farmers. The problem now, is not finding a solution, but how we can get it to people. This is why I decided to release "One Cup, One Life" so that every man has

the chance to save himself and those around him. If they would have let this technology be opened up for everyone to benefit we would be in a different situation today. As we see, now they have put this control on the KF, if we have found the solution, then what will be the consequences on those people who stopped the technology from coming out? Just be ready, we do not know, but as KS you have been taught well what to do, and if the situation gets worse, it doesn't matter if you call it Quantum or Gans, you will be known as the darling saviors and maybe that's why you have been taught and why you learned these things.
We had a very interesting situation in China last week, one of the KS we know, who holds large amounts of Gans's, was supposed to deliver his Gans's to prevent the disease from spreading. He has put a very high value on it. I made a call to him and I said, 'this is what you are asking, but it is for your nation.' He said, 'Mr. Keshe, I don't care about the nation, I have learned this technology to become a rich man. I want to be a millionaire like you with your technology. I don't care how many Chinese die.' We will see a lot of new faces.

If Critical Situation Occurs:
If we see that situation becomes critical, KF will run a daily operation on all channels left open and we'll instruct accordingly. We continuously have something setup. I have prepared certain ways that we have to go in what I call, space level technology. I have already foreseen such a thing and what I have taught you in KS Workshops 311, 312, and 313 are the beginnings for these actions. In our research centers we have already developed systems for mass feeding and mass disinfecting. We are prepared to meet the demand, if required. You have to understand that if we go too fast, they'll say, 'they are hyping,' and if we go too late many people will loose their lives. The KS around the world have to be ready, we have no choice. The video which we released in China has already gone crazy people have started looking at, and making the Gans. If needed, we'll run what we call, a Life Blueprint day, where we'll teach continuously around the clock, from different parts of the KF around the world.

One Nation, One Planet:
We are taking charge as One Nation, so for me Chinese, English, Brazilian, Iranian, Arab is irrelevant. we have to reach around the planet. This more or less, sets us, the KF, as One Nation, One Planet, One Race.
If it gets to the point that governments can't control the situation then the KF we'll start leading. We will govern through the heart and soul of the man, to save it, not with taxation and governments. In so many ways, everything is ready to start this process, but we have to be very prudent, that we do not start before it's needed, but to be there to take it in every possible direction.
When the heads of nations do not travel because of the virus, it means their nations are locked down. Then you need a structure that it is international and where everyone works through one ethos, one way of thinking. The KF has started the process of nations without borders, without languages, and where knowledge is open to everyone. Isn't this what we wanted. We hope that we don't get to that position with this virus, but it seems mankind is heading that way.
The disease has traveled deep right across, the people who landed in London have travel to Manchester and other places to see their families for the New Year, they also traveled by train, and if the contamination is there many European countries are shutting up and not talking about it. If you haven't heard UAE has started a free vaccination compulsory two days ago. And the hospitals are full. You can imagine, 80,000 Chinese have gone through transit and walked around Dubaiwith all the other foreigners plus around the lounges, plus everywhere else. This disease has gone everywhere and the governments are shaking in their skin. They are treating this as a normal flu and people are dying because they don't have the appropriate support facilities. We have to wait and see how these 2 cycles of 12

days of incubation have created a condition, and we should see the peak somewhere around the beginning of March. We estimate over 10 million plus are infected.
I have already called the Chinese community to meet next Monday to strategize for food, energy, and security. If the governments can't govern to protect their citizens from this problem, then we are there to support the nation without interfering with the government. We have to wait and see. But be prepared for the worst eventuality, if it doesn't happen, at least we have learned something. It goes back to "the last man standing." If you are the last man standing for your family, or for your citizens, your job is to serve your nation and not yourself.

Unique Aspect of Coronavirus:
A question was asked, the Coronavirus is a cluster of energy, first it goes through incubation time, and then goes into the matter state and manifests in the body, so .. K- No, no it doesn't work that way. This virus is a very special virus, in a way, most of the viruses don't work that way. If this is the cell, you get a very small energy pack (draws a red figure on top of the cell), this energy pack gives weaker, stronger then this, and as it gives, it takes from the environment, this becomes the closing of the circuit, and in that process it takes over the whole structure. It takes from the weakest and gives as the strongest, this is why it kills so rapidly. We see a specific structure in the lungs of the victims .. It takes energy in the most rapid way.

The Golden Rule:
In any process with the plasma or the Gans, it doesn't matter what you do, f you follow the "Golden Rule" you will always succeed. You have air, water, and a solid. For the air you do the breathing, for the water you drink, and for the solid you have the body and for this you make a patch. However, in this case by wetting your hair and washing your face with the Gans you make the best patch to drain the energy from the virus. People who follow the golden rule have always succeeded, 100%.
If you keep on killing the virus nothing happens, but in this process you drain the energy of the virus and that food for the body.
Questions About the Gans:
A KS says he hears voices in his telling him things about the Gans, what are these? K- I am not in his head. We are not in his head we don't know.

(There may be still some points in the talk that I missed please see the transcription.)
